p.s.

here are the data on remittances just published by Eurostat [https://ec.europa.eu/eurostat/statistics-explained/index.php?title=Personal remittances statistics](https://ec.europa.eu/eurostat/statistics-explained/index.php?title=Personal_remittances_statistics). If you go to the Eurostat table, you can select EA as a partner country in the BoP

(https://ec.europa.eu/eurostat/databrowser/view/BOP_REM6_custom_1785893/default/table?lang=en) I believe the same data are also on the SDW of the ECB. In the call we didn't really talk about the link between digital euro and the international role of the euro.

Here are the TARGET data, you will find several comparisons with EURO1 and other RGS around the world <https://www.ecb.europa.eu/pub/targetar/html/ecb.targetar2020.en.html>. Below is the TARGET2 vis-a-vis EURO1 chart (Section 1.5)
