

# Wage dynamics and labour market institutions

Philippe Marcadent

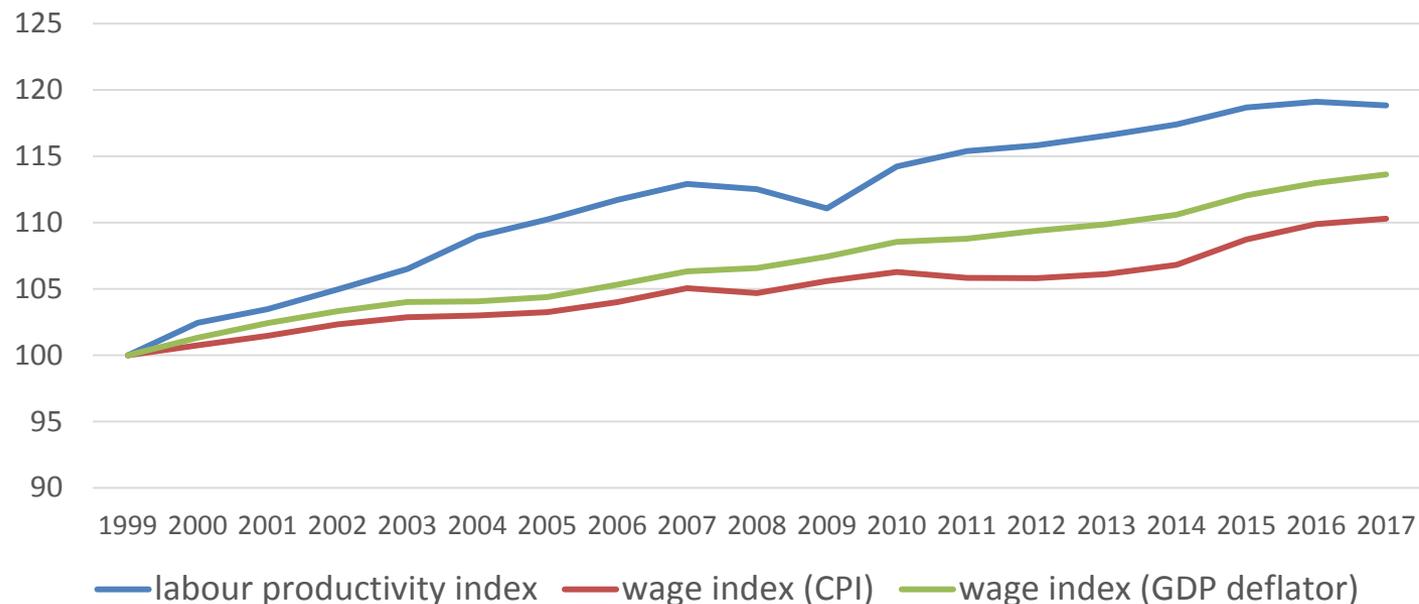

Inclusive Labour Markets, Labour Relations and Working  
Conditions (INWORK)

ILO Geneva

# The decoupling between real wages and labour productivity growth

Index of real wages and labour productivity  
in advanced economies

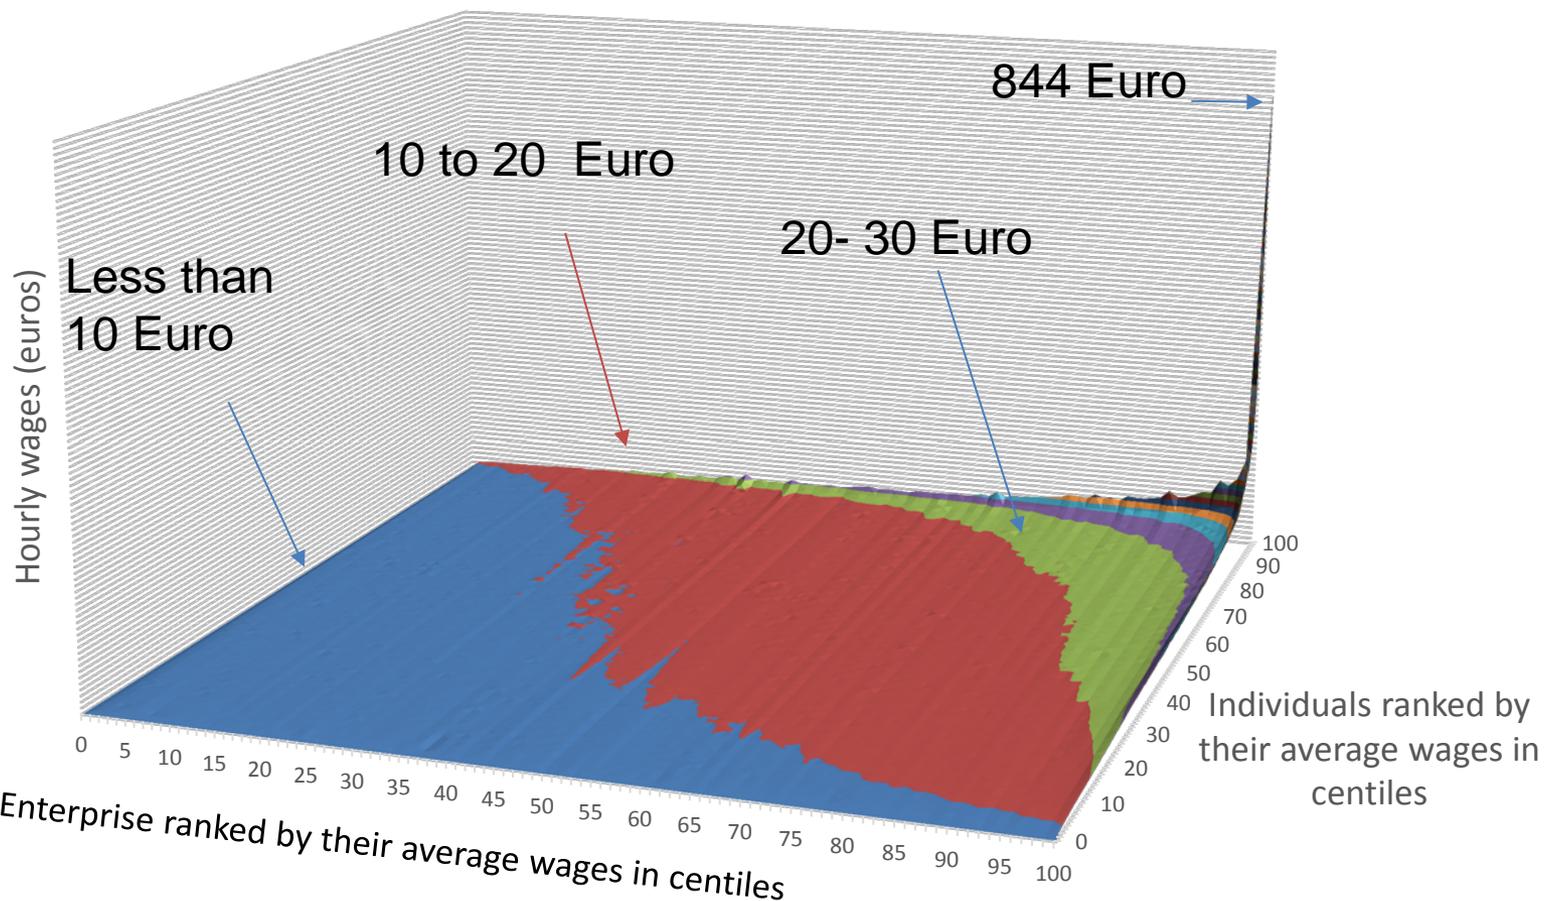

Note: The wage and productivity indices are calculated as a weighted average of year-on-year growth in average monthly real wage and GDP per worker in 36 economies:

# Wage inequality in Europe

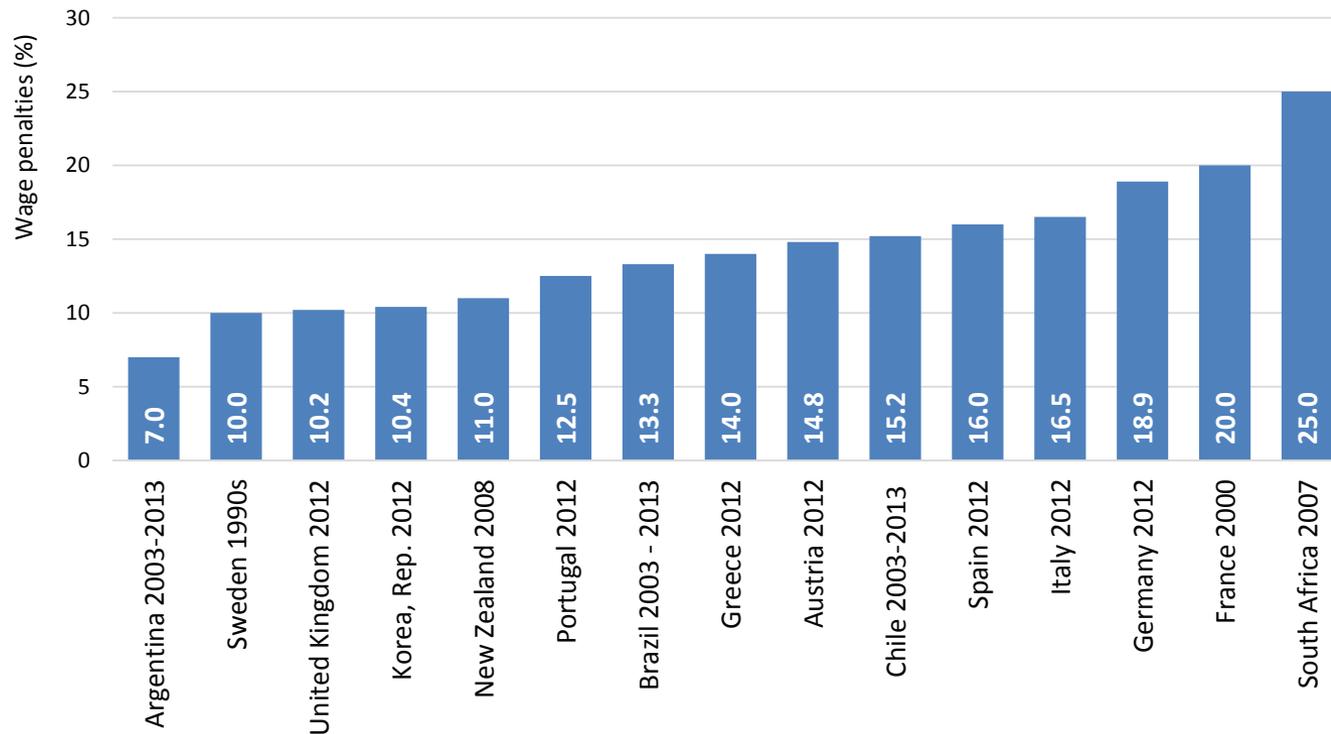

Note: These estimates are based on weighted averages of 22 European countries

Source: ILO estimates based on EUROSTAT Structure of Earnings Survey (SES) ; See ILO Global Wage Report 2016/17

# Incidence of employment arrangements on wages: penalties for temporary work

Wage penalties for temporary contracts - selected countries

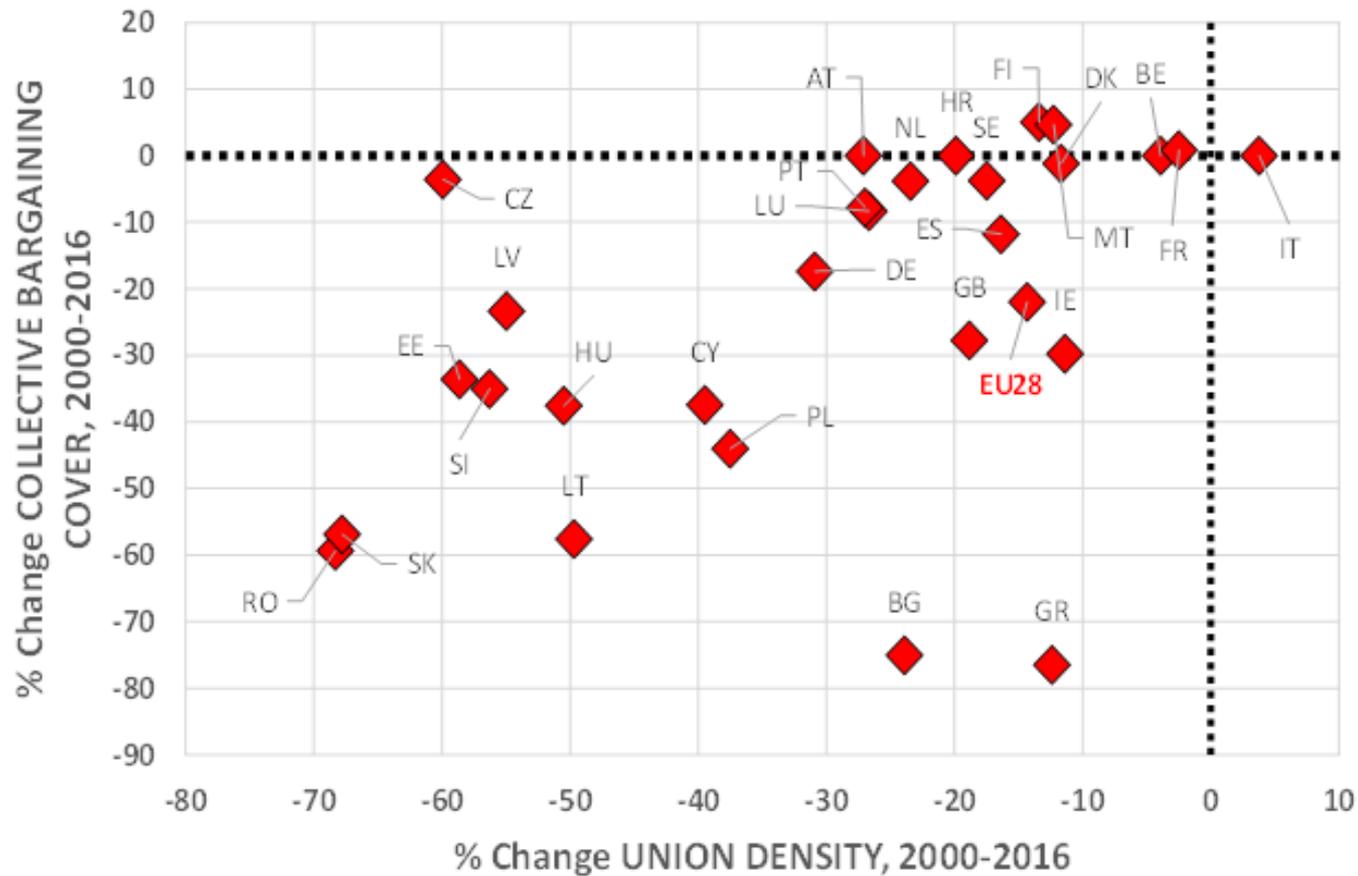

Note: Partial coefficients from regression analysis, controlling at least for age, education, occupation and sector of activity (other controls vary across studies). Years refer to the years of data on which the analysis was based.
